Focus on the essential and practical functionalities for the system to avoid making the project scope too broad.	Complied	In scope and limitations, some irrelevant features were removed and essential features and functionalities were applied instead.	Page 9
Review all the proposed system features and ensure only feasible and achievable functionalities will be included in the study	Complied	In comparative analysis of related works, reduce the list of features that is essential to the proposed system	Page 18-19
Add a notification feature alert students regarding missing internship requirements and documents	Complied	Inserting default notification for all users on comparative analysis	Page 18-19
Include due dates and deadline tracking functionalities for document submissions and internship requirements	Complied	Adding due dates and deadline tracking to scope of the study	Page 37
Include a checklist and file status monitoring features to help students track completed and pending internship requirements	Complied	Adding compliance module	Page 36-38
Implement timestamping of submissions to record the exact	Complied	Adding tracking module	Page 36-38

Reviewer Comment	Compliance Status	Revised Justification / Action Taken	Where Found in the Manuscript
date and time documents are uploaded or submitted.			
Include a submission history tracking feature for monitoring previous document submissions and updates.	Complied	Adding compliance and tracking module	Page 36-38
Include document submission management for organized uploading, storing, and handling of requirements.	Complied	Adding compliance and tracking module	Page 36-38
Include a dashboard feature that displays important internship-related information and analytics.	Complied	Adding dashboard for analytics	Page 36-38
The dashboard should provide statistical summaries for internship records and student deployment data.	Complied	Adding dashboard for analytics	Page 36-38
Include report generation for coordinators and administrators to easily produce internship-related reports.	Complied	Adding dashboard for analytics	Page 36-38
The dashboard should include tracking reports to monitor student progress, requirement completion, and internship performance.	Complied	Adding dashboard for analytics	Page 36-38

Prof. Marylene S. Eder, MIT

Revisit and revise the Statement of the Problem to better align with the actual issues experienced in internship management.	Complied	Changed Specific Problem 1.2.2.1	Page 7
Include a system feature that can accurately track late document submissions	Complied	Added these features to comparative analysis of related works	Page 18-19

Reviewer Comment	Compliance Status	Revised Justification / Action Taken	Where Found in the Manuscript
The proponents need to elevate their study by focusing on monitoring accuracy and data-driven evaluation of internship performance.	Complied	Adding compliance and tracking module	Page 36-38
To improve monitoring accuracy using real-time stamp features, if applicable	Complied	Adding document compliance and tracking module	Page 36-38
Suggests adding a capable messaging feature for communication.	Complied	Adding messaging module as default system feature	Page 36-38
Include a system feature that can track the number of undeployed students.	Complied	Adding dashboard for analytics	Page 36-38
Include a system feature that can track delayed deployments.	Complied	Adding dashboard for analytics	Page 36-38
Include a system feature that can track missing documents.	Complied	Adding document and tracking module	Page 36-38
Include due date notifications specifically for OJT coordinators	Complied	Adding document and tracking module	Page 36-38
Remove the signature detection feature as it is not necessary in the proposed system.	Complied	Removing the signature feature on the comparative analysis of related works, objective of the study, and core system features	Page 7, 18, 36
